

## Inspection & testing of chain, chainslings and components

### Product information

We perform annual control of lifting gear with regard to obedience to legislation, which stipulates that chainslings and components must be checked for the user's safety. We control the lifting equipment visually or for example by means of non-destructive testing.

With the Mennens "Certif" service we provide an online platform where you can login with your account to find, manage and print all your certificates of products bought at or inspected and certified by Mennens.

**I'd like to have more information about this service**

Inspection of Chain and components
